

SMART I

HANDHELD INKJET CODING SYSTEM

Smart · Reliable · Easy Operation

Smart I is the smallest and easiest to operate printer developed based on HP print tech. It is with high print speed and high resolution. It can print variable data including text, batch number, manufacture& expiry date and image, matching with various kinds of production lines from package machine supplier to SI. Smart I takes LPC standard to control language drive, it can be used a print engine. And third party equipment can control printer by serial port.

Highlights

Easy operation, no need of any training.

Full metal shell, industrial design and stronger.

Take HP original driving board to make print effect higher quality

Wireless print head verify tech , more stable and intelligent

Product details

Parameters

Print height

Smart I	12.7mm
Smart I Plus	25.4mm
Smart I Plus-2	50mm

Resolution

76 m/min@ 300×300DPI
150m/min@300×150DPI

Port

USB/ RS232

Print data type

Text, batch number , manufacture& expiry date,
image

Temperature/Humidity

5℃~35℃ / 10%~90%

Print system

HP TIJ2.5

Interface

Color Touch Screen

Variable data

Text, batch number , manufacture& expiry date

Other

Simulation speed print\Simulation sensor print

Max power

30W

Power

110-220VAC 50/60Hz

application

Wooden materials

Carton box

Plastic materials

Plastic Steel Pipe
